Globus-Panel

19" LCD Pen Input Display

The **Globus-Panel** combines the advantages of an LCD monitor with the simplicity of using a pen-input device. Whether you are a professor teaching a lesson from a podium or an executive delivering a presentation, the **Globus-Panel** allows you to add annotations and life to your material while constantly facing your audience. The **Globus-Panel** allows users to work directly on the LCD display using a pen to control and annotate on top of any software application running on a connected computer. By connecting an Multimedia projector or other display, your audience can see your notes and presentation as you work. Like the rest of the Globus's interactive products, the **Globus-Panel** includes the powerful yet intuitive Interactive annotation software. Using the Interactive Software, presenters or teachers can make annotations directly to the screen, highlight key points, import clipart, use a variety of included background templates, or even convert your hand-written notes to text. All of the notes, images and annotations can be saved in a variety of formats, printed or e-mailed for action items, absent students of anyone else may need to see them. The **Globus-Panel** can be used in conjunction with any of the Globus Interactive products including the Interactive Board, Interactive Pad and Interactive Audience Response System

Included with your purchase:

- Interactive Globus-Panel Display
- USB Cable
- VGA Cable
- Power Supply
- Interactive Software
