Design with Elegance

Smooth edges, class apart finishing offers a luxurious look. Smooth surface, designer appearance and digital features lift any session to the next level and add value to it. Can also be customized in different designs, finishing, sizes & shapes.

Inbuilt Controller

A central multimedia controller that handles all the switching and controlling functions of the device. It saves the time of a presenter as he/ she does not have to toggle between switches to control different functions.

Enhance your podium

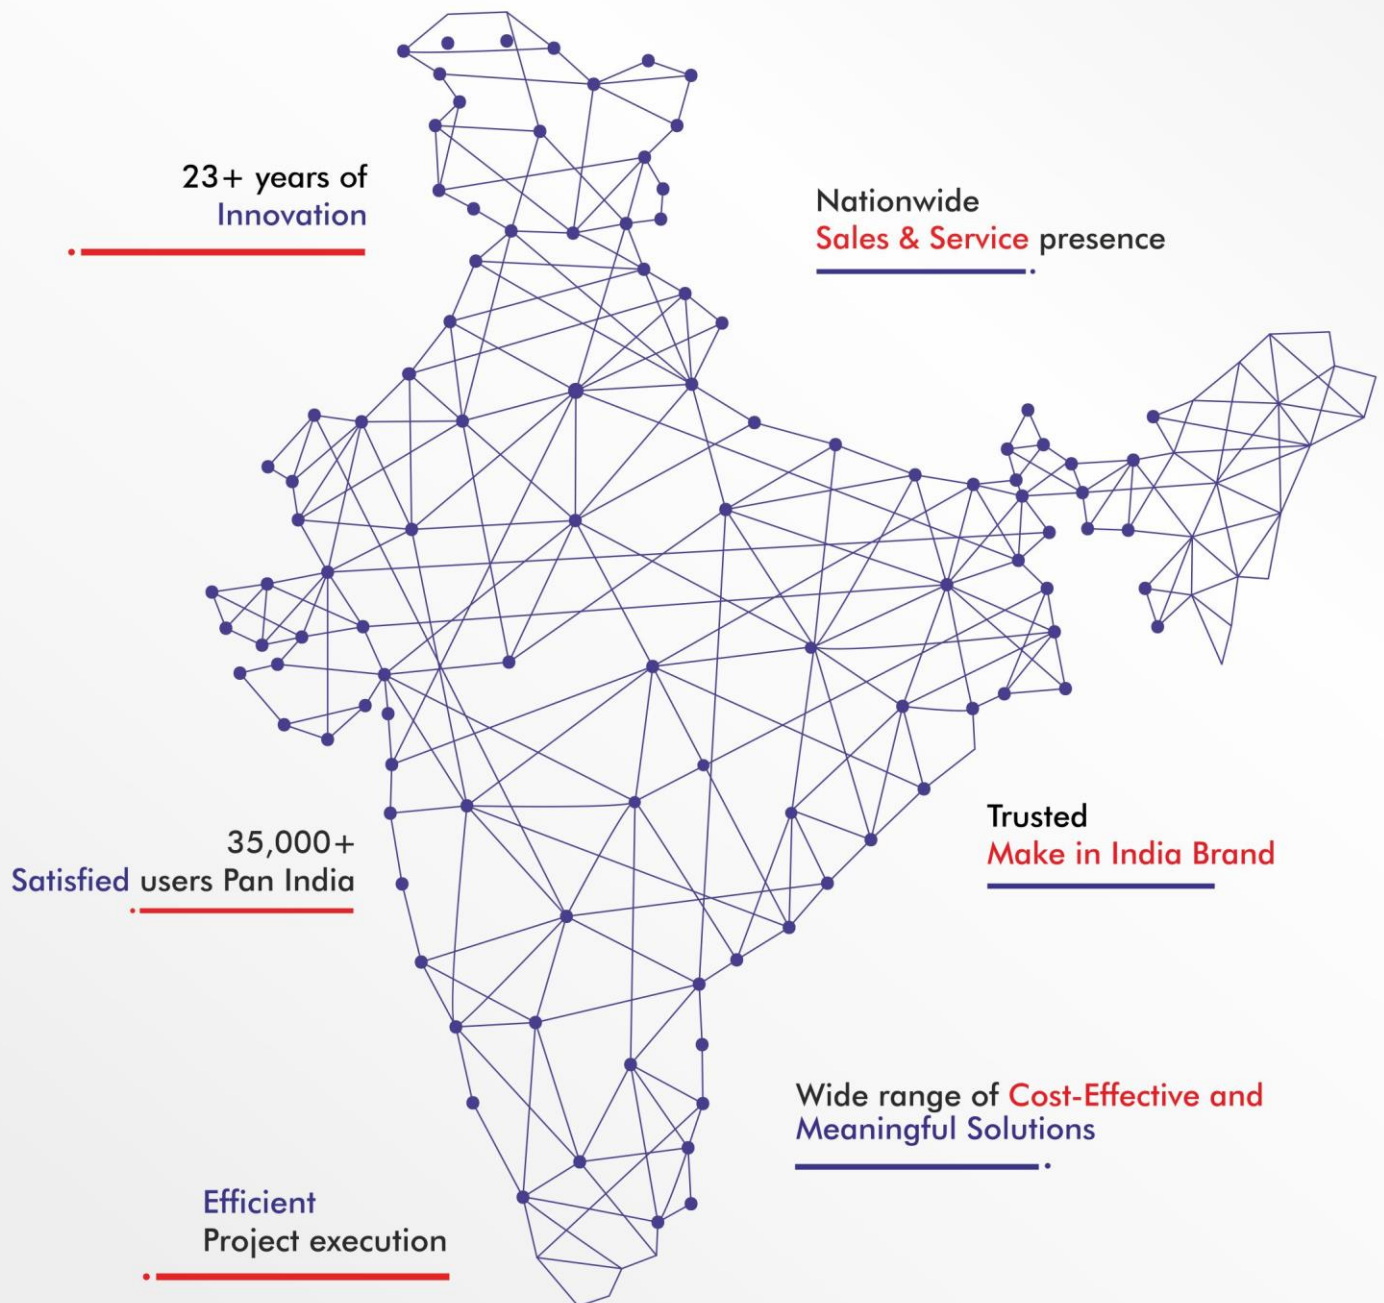

Option to incorporate an interactive screen of 15 inches or as per the size of the podium. It will leverage you to do live annotation on a screen and make your session more successful. The top side pop up box can also be added if required.

The frontal & the Back

The front side can be easily customized with the organization' logo / branding. And the rear part of the podium has a cabinet with a door to lock when not in use. The top space has grommet for neat look and gooseneck mic. Modular power socket provision is also available.
