Explore Interactivity Tools

Inbuilt Globus Board Software that allows instructor to make the topic more enthralling while getting the leverage to edit, save, erase, highlight, colour, shape, print, email, record, and use brushes. Also, multiple finger touch options provide a broader framework for maximizing learning.

AI-Enabled Tools

AI Pen tool let users simply doodle an object and search for relevant & informative images on Google. Interactive Touch Panel AI tools recognize texts, and shapes are drawn and convert hand-drawn images to Google-sourced images for easy referencing during meetings or classroom sessions

Increase Efficiency with Split-Screen

Make your sessions more impactful with an inbuilt split-screen feature this enables users to smoothly switch between applications and gives leverage of displaying more content.

Intelligent Gesture Control

The intuitive touchscreen and intelligent gesture control facilitate users to write, erase, touch, and hand gesture efficaciously. Using simple gestures & collective fingers movements, users can put the screen to sleep mode, get a floating menu on the main screen, change menu options, swipe the screen upside down for a pull-up menu, etc
