

Nationwide Sales & Service Presence

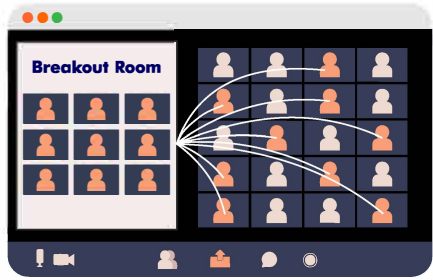

## Virtual Classroom Solution Software

A virtual classroom is an online classroom that allows participants to communicate with one another, view presentations or videos, interact with other participants and engage with resources in work groups. It helps presenter & participants to communicate, learn and deliver knowledge without being physically present at same location

## Breakout Rooms for Individual Attention on Students

Breakout Rooms allow teacher to split learners into multiple smaller groups facilitating more personalized learning experience and peer-to-peer participation. Breakout rooms can assist all sorts of student needs and wants.

## Built in Quiz & Communication

Teacher can interact with students using collaborative tools like Q&A sessions, quizzes, group chat/moderator chat to keep students focused and engaged. Generate reports easily with just one click for instant feedback.

## Browser Focus Alerts

Get real time indications on the focus of your learners during a live classroom. It sends real-time alerts to the instructor when a student is looking away from the Virtual Classroom, allowing teacher to take corrective measures in time.

## Be there in a click

One click to join virtual classrooms where participants interact face-to-face from anywhere and on any device - No downloads or installations required

## Engage Learners with Multimedia

Teachers can prepare a list of multimedia files like presentations, documents, PDFs and excels well in advance before commencing the classroom. This prevents the last-minute hustle for teachers and enables them to focus more on teaching.

## Multiple Participants Screen Layout

Display up to 20 participants on the screen simultaneously, focusing more on active users. Toggle between participants in focus at any point of the session.
